# PRESS RELEASE

## Xylo Technologies Named to Fast 50 *Continues Trend of Recognition for Organizational Success*

**Rochester, May 29, 2009:** Only a few months after being recognized in the Inc. 5000 list of Fastest Growing Companies, Xylo Technologies has once again been highlighted for its record of ongoing success. The United States Pan Asian American Chamber of Commerce (USPAACC) has named the company, a provider of technology based staffing and consulting services, to its **2009 Fast 50 list of Asian American Businesses.**

The award, bestowed upon Asian American owned businesses with a record of progressive growth, was met with excitement by company founder Dharani Ramamoorthy. "We are truly honored to receive this recognition. Our story is the classic American success story – through hard work, humility, and dedication to our customers, we have been able to achieve so much!"

A program of the USPAACC Education Foundation, the Fast 50 recognizes the robust growth and stability of Asian American owned businesses. A wide range of criteria are used to select companies who make the Fast 50. Ramamoorthy accepted the award on behalf of Xylo Technologies at an awards banquet hosted by the USPAACC.
